

Reopen Safely with SENTRY

SENTRY

IT'S TIME TO GET BACK TO WORK

SENTRY (Safe Entry) is the easiest way to empower your community to self-report before safely arriving on-site each day.

HOW IT WORKS

1. DAILY SURVEYS

Each day before arriving, staff complete a health survey. Questions are customizable and can be tailored towards your organization.

2. PHOTO VERIFICATION

Respondents submit a self photo with visual validation of their body temperature. Integration with Thermal Mirrors is also available.

3. SENTRY PASS

After successfully completing the survey, staff are automatically issued a SENTRY Pass with scannable, programmable QR codes.

4. CHECK IN

Keep track of who is on property by enabling scanning of SENTRY passes to check in staff. No extra hardware required, any smart device will work.

5. REVIEW REPORTS

View detailed summary reports filtered by day, time, role, list, pass status, and check-in status. Passes can even be revoked as needed.
